

10 Year Fire Death Rate in Ontario: All Fatalities and Fatalities in Preventable Structure fires

Fire Death rate: the number of fire fatalities divided by the population multiplied by 1 million

* **All fire fatalities rate:** This include homicides and suicides and all other fire deaths.

** **Preventable:** Fires that were not deliberately set, including fires where cause is under investigation or undetermined.

Subject to Revision: Fires under investigation are included in preventable fires. If the cause is determined to be Arson, the number of preventable structure fatalities rate will decline.

Note: Does not include fire deaths on Federal or First Nations properties
